## **DETAILED ACTION**

### ***Election/Restrictions***

1.

I. Claims 1-18 are drawn to an exercise garment having an adjustable tension element classified in class 2, subclass 69.

II. Claim 19 is drawn to an exercise garment having an adjustable tension element with resilient arm members, classified in class 2, subclass 16.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the exercise garment having an adjustable tension element with resilient arm members has utility by itself. The subcombination has separate utility with the exercise apparel having an adjustable tension element being secured about the torso.

Art Unit: 3765

3. A telephone call was made to Mr. Steven Koerber to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
